

ABSTRACT

A means to use the natural forces of nature when correctly understood and applied to move personnel and objects from Earth's surface

10 to outer space using a conduit with valves, access air locks, support & stabilizing means, to redirect and throttle naturally occurring forces. A magnetic field may also be used. The magnetic field may be applied parallel or longitudinal to the conduit. "Outer space lake substance" Redirecting Means may be utilized with the conduit in order to assist in moving a vessel

15 with personnel or objects to or from outer space.
